AMERICAN INDIAN AND ALASKA NATIVE HERITAGE MONTH: CELEBRATING PENNSYLVANIA'S AIAN POPULATION

Pennsylvania is home to approximately 23,641 American Indian and Alaska Native (AIAN) residents according to the American Community Survey (2011-2015, 5-Year Estimates). Of those individuals a majority are American Indian (69.1 percent). The American Community Survey provides detailed data on the AIAN populations' tribal heritage when specified. In the state of Pennsylvania, 65.2 percent of American Indians specified a tribe or tribes from which they trace their ancestry as opposed to just 3.6 of Alaska Native residents.

Top 10 Tribes by Percent of American Indian Population (AI) in Pennsylvania

Pennsylvania
State Data Center

U.S. Census Bureau
2011-2015 ACS, 5-Year Estimates

About 1 in 5 of American Indians in Pennsylvania specified their tribe as Cherokee (21.3 percent) making it the most represented tribe in the Commonwealth. Mexican American Indian (15.4 percent) and South American Indian (13.5 percent) followed Cherokee American Indians as the second and third largest specified tribes. Other tribes represented Pennsylvania not listed in the graphic include Blackfeet (2.0 percent) and Navajo (1.9 percent).

Recent Research from the Data Center

Research Report: Population through the Ages

Pennsylvania's elderly population (age 65 and over) grew at 20 times the rate of Pennsylvania's general population from 2010 to 2016. Persons age 65 years and over accounted for 17.4 percent of Pennsylvania's population, up from 15.6 percent in 2010. This report analyzes how Pennsylvania's aging population has affected the state's dependency ratio since 2010. Click [here](#) to read more in this month's report on aging in the Commonwealth.

Research Brief: Pennsylvania Trends in Mortality, 2015

Over 130,000 Pennsylvanians died in 2015, mainly as the result of major cardiovascular diseases (31.2 percent of all deaths) and cancer (21.6 percent). Males were more likely to die from a variety of causes of death (e.g. cardiovascular diseases, most cancers except breast, suicide, and homicide) than females in 2015. Black or African Americans had the highest age-adjusted death rates in the state followed by White and Hispanic residents while Asian residents had the lowest death rates. Fulton County had the highest rate for all causes of death. Click [here](#) to read more in this month's brief on mortality on the Commonwealth.

2016 Service Annual Survey Released

The SAS provides statistics on revenue, payroll, sources of revenue, expenses, exports, inventory, e-commerce and other selected industry-specific data for companies whose primary business or operation is to provide services to individuals, businesses and governments. This is the first SAS release to include information for Accommodation and Food Services. Activities classified in this sector were previously included in the Annual Retail Trade Survey.

Survey of Income and Program Participation (SIPP) Data Available

The SIPP is a longitudinal survey that samples the same individuals over a four-year period. It provides comprehensive information about the income and program participation of individuals and households in the United States, as well as the principal determinants of income and program participation.
