

## Child Diversity Dashboard

We recently released a Child Diversity Dashboard and report in collaboration with our affiliate, Pennsylvania Partnerships for Children. The report highlights state level trends in the increase of children of color while the dashboard allows users to get data for at the school district level.

Some key findings include that one-in-three Pennsylvania children are children of color and that over 80 percent of school districts had a higher share of children of color in 2017 than 2009.

### Did you know?

Adults with advanced degrees are more likely to report underemployment in temporary positions than those with Associates or Bachelor's degrees. Click [here](#) to read more in this June's Tipsheet.

## Other Highlights from the Data Center

### 2018 Detailed Population Estimates Report

This brief uses data from the U.S. Census Bureau's 2018 Detailed Population Estimates to report changes in Pennsylvania's Population by age, sex, race, and Hispanic origin. Click [here](#) to read the full brief.

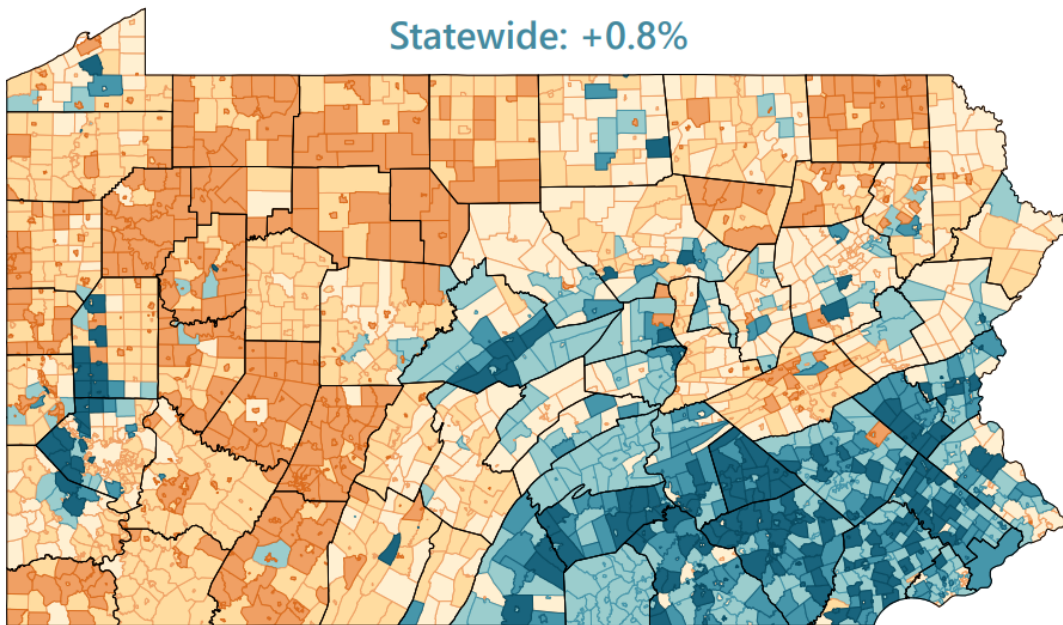

### Neighboring Municipalities and Commuting Flows Visualization

This interactive visualization shows patterns in the place of residence and place of work for Pennsylvanians. It includes four categories which expand our understanding of commuter flows by considering those who work (or do not work) in a municipality that neighbors the municipality in which they live.
